PROFESSIONAL SUMMARY

Recent Computer Science graduate from Ain Shams University with a strong foundation in software engineering and a growing interest in computer networks and network administration. Experienced in backend development using Java and Spring Boot, building RESTful APIs, and working with databases and modern development tools. Completed basic CCNA training with knowledge of networking fundamentals, including TCP/IP, routing and switching, subnetting, VLANs, and network troubleshooting. Passionate about learning new technologies, solving complex problems, and building reliable and efficient systems.

TECHNICAL SKILLS

Languages	Java, Python, C++, Kotlin
Backend	Spring Boot, Spring Data JPA, Spring MVC, RESTful APIs
Databases	MySQL, JPA / Hibernate
Mobile	Android (Kotlin, Java)
Networking	CCNA Fundamentals, TCP/IP, OSI Model, IPv4 Addressing & Subnetting, DHCP, NAT, Cisco Packet Tracer
Tools	Git, GitHub, Agile / Scrum

EDUCATION

Bachelor of Computer Science | Ain Shams University
Cairo, Egypt

Oct 2020 – May 2024

During my academic journey, I built a strong foundation in computer science, software engineering, and networking fundamentals. I gained hands-on experience in programming using Java, Python, and C++, while developing a solid understanding of object-oriented programming, software design principles, and problem-solving techniques. In addition, I completed training in computer networking concepts, including TCP/IP, routing and switching, subnetting, VLANs, and network troubleshooting through CCNA studies and practical lab exercises using Cisco Packet Tracer. I also gained experience in mobile application development through practical projects and collaborative teamwork.

PROJECTS

Vision Guide | Graduation Project

Oct 2023 – Jun 2024

Assistive technology app using machine learning to assist visually impaired users

- Led a team to architect and deliver a real-time assistive system that processes live camera input and provides auditory guidance to visually impaired users.
- Integrated deep learning models using TensorFlow and OpenCV for object detection and scene description, achieving real-time performance.
- Owned end-to-end quality assurance: designed test plans, performed performance profiling, and iteratively improved system accuracy and usability.
- Python, TensorFlow, OpenCV, Android**

Recipe Management Application | ITI Internship — Android Project

Jul 2024 – Aug 2024

Native Android app built in Kotlin consuming an ITI-provided REST API with offline support via Room Database

- Developed a native Android recipe management app in Kotlin, implementing clean architecture with a clear separation between UI, data, and business logic layers.
- Integrated ITI-provided RESTful APIs using Retrofit for fetching, displaying, and managing recipe data, with proper error handling and loading state management.
- Implemented Room Database for local data persistence, enabling full offline access to previously loaded recipes without re-fetching from the server.
- Kotlin, Android, Retrofit, Room Database, RESTful APIs, MVVM**

FMCG E-Commerce Android Application | University project supervised by Al-Ahly Momkn team — Android Project

Feb 2024 – Jun 2024

Android e-commerce app for Fast-Moving Consumer Goods with full auth and order management

- Architected and built an Android e-commerce application supporting user authentication, profile management, product browsing, and order lifecycle management.
- Integrated backend RESTful APIs into the Android application for product management, authentication, and order processing.
- Implemented user authentication features including login and registration using JWT token-based authentication.
- Java, Android, Retrofit, XML**

SOFT SKILLS & ATTRIBUTES

Strong team player with experience collaborating in cross-functional environments and working within Agile/Scrum teams. Possess strong problem-solving and analytical skills, with the ability to learn new technologies quickly and adapt to different challenges. Detail-oriented and committed to writing clean, high-quality code, with good communication skills for both technical and teamwork settings.
